Education

- **Indian Institute of Technology Mandi** **2024-2026**
  MBA DS &AI 7.81/10 CGPA
- **Rajiv Gandhi Government Engineering College Kangra** **2017-2021**
  B. Tech Mechanical Engineering 7.78/10 CGPA
- **K.V Naleti** **2017**
  Class 12 89%
- **CAT** **2023** 98.29

Experience

Technocolabs Softwares Inc. **Data Science Intern** remote Jun 2025 – July 2025

- Led the creation of a RAG-based Conversational AI, enabling non-technical users to query complex FCD/NCR datasets via natural language.
- Architected a secure LangChain and NVIDIA LLM engine that translates user intent into executable Pandas code using dynamic classification.
- Reduced semantic search latency and optimized high-volume querying by integrating FAISS vector databases and Apache Parquet.
- Launched an interactive Streamlit web interface to provide end-users with real-time document insights and workflow .

Mrs. Bector's Food Cremica **SCM-Finance** onsite May 2025 – July 2025

- Validated ROI for ₹70+ Cr CapEx projects using financial modeling to drive strategic capacity expansion and product roadmap decisions.
- Aligned cross-functional teams (supply chain, operations, finance) to optimize yield and logistics for enterprise B2B clients like KFC and Burger King.
- Built Power BI dashboards for real-time KPI tracking and automated reporting workflows using Python and Excel, reducing turnaround time by 90%.
- Identified 10–15% cost-saving opportunities by benchmarking operational metrics, driving data-backed efficiency initiatives across manufacturing units.

Personal Projects

- **Go-To-Market & User Acquisition Strategy: Newsletter MVP**
  - Conceptualized and launched a targeted MVP content product (newsletter) tailored specifically to the college student persona to address campus information gaps.
  - Designed and executed a grassroots Go-To-Market (GTM) strategy, pitching directly to target users to test value propositions and gather qualitative feedback.
  - Validated early product-market fit and user demand by successfully converting and onboarding 50+ initial subscribers through direct acquisition efforts.
- **AI Business Analyst Agent**
  - Led the end-to-end development of an LLM-powered analytics product, enabling sales and marketing teams to instantly extract business insights using natural language.
  - Architected the product's backend logic by defining user-intent classification models and multi-dataset feature engineering pipelines to ensure high-accuracy data retrieval.
  - Launched an interactive Streamlit dashboard to end-users, driving adoption and streamlining automated business performance reporting.
- **Holistic SME Credit Scoring Model | Management Project (Ongoing**
  - Conducted user discovery via in-depth SME interviews to identify traditional lending gaps, translating qualitative user pain points into a measurable Qualitative Credit Index (QCI).
  - Designed the product architecture for an AI-driven credit evaluation platform integrating financial data (Prowess IQ) with real-time sentiment analysis.
  - Conceptualized a holistic scoring framework combining financial metrics with tailored government scheme recommendations to improve overall SME credit accessibility.

Achievements

- Semi-Finalist – Grant Thornton National Case Competition (Top 50/4,200+ teams). **2025**
- Third Position – HIBS & AI-xcelerate Case Competition. **2024-25**
- CAT 2023 – 99.98 in Quantitative Aptitude **2023**
- Leadership- Organized IIT Mandi HST 2024, hosting 100+ startups and investors. **2024**

Skills and Coursework

Product Analytics & Experimentation: Hypothesis Testing, A/B Testing, Regression Analysis, Forecasting Techniques, SQL.
Data Visualization & Business Intelligence: Power BI, Excel, Streamlit.
AI Product Architecture & ML: Python, Transformers (LLMs), NLP, Sentiment Analysis, , RAG Systems.
