Education

- **Indian Institute of Technology Mandi** **2024-2026**
  MBA DS &AI 7.81/10 CGPA
- **Rajiv Gandhi Government Engineering College Kangra** **2017-2021**
  B. Tech Mechanical Engineering 7.78/10 CGPA
- **K.V Naleti** **2017**
  Class 12 89%
- **C.A.T** **2023** 98.29

Experience

Mrs. Bector's Food Cremica **SCM-Finance** May 2025 – July 2025

- Developed division-wise **budget tracking dashboards (Excel)** with index-based performance comparison to monitor operational cost **variances** and improve financial control across plants.
- Collaborated with plant managers, supply chain, and finance teams to track **material costs, logistics expenses, and yield efficiency** for **QSR** clients such as **KFC** and **Burger King**, supporting operational cost optimization initiatives.
- Conducted feasibility **analysis** for ₹70+ Cr **CapEx projects** using **NPV**, IRR, and **Payback** Period to support data-driven capacity expansion and process improvement decisions.
- Designed interactive **Power BI dashboards** to monitor **inventory aging**, production cost trends, and plant-level **KPIs**, enhancing real-time **operational visibility.**
- Automated inventory aging reports using **Excel + Python**, reducing reporting turnaround time by **90%** and improving working capital efficiency.
- Performed cross-plant benchmarking of **Labour, Power & Fuel (LPF)** costs against production output, identifying **10–15%** cost-saving opportunities through process efficiency improvements.

Personal Projects

- **Holistic SME Credit Scoring Model | Management Project (Ongoing**
  - Designing a **holistic SME creditworthiness and credit risk framework** by integrating **financial data (Prowess IQ)** with **qualitative and real-time sentiment analysis** to assess business stability and market perception.
  - Conducted in-depth **SME** interviews to **identify gaps in traditional bank lending models, translating non**-financial factors into a **Qualitative Credit Index (QCI)**.
  - Proposed an **AI-driven credit evaluation platform** combining **financial metrics, sentiment-based insights, and sector-specific government scheme recommendations** to improve SME credit accessibility.
- **Inventory & Supply Cost Optimization Simulation**.
  - Developed an **EOQ-based inventory optimization model** to minimize total supply chain costs by balancing ordering and holding expenses.
  - Simulated multiple demand, **lead-time**, and cost scenarios to evaluate **trade-offs** between stock levels and **procurement frequency.**
  - Conducted cost sensitivity analysis to identify optimal replenishment strategies under demand variability.
- **Supply Chain Optimization & Demand Forecasting**
  - Built a **machine learning–based demand forecasting model (Random Forest Regressor)** to predict weekly store-level sales across multiple retail locations.
  - Performed data **preprocessing**, **feature engineering** (seasonality, promotions, store attributes), and exploratory analysis to identify key demand drivers.
  - Evaluated model performance using **RMSE** and **R^2**, improving forecast **accuracy** over baseline models to support **inventory planning** and replenishment decisions.

Achievements

- Semi-Finalist – Grant Thornton National Case Competition (Top 50/4,200+ teams). **2025**
- Third Position – HIBS & AI-xcelerate Case Competition**.** **2024-25**
- CAT 2023 – 99.98 in Quantitative Aptitude **2023**
- Selected from a competitive pool of **1,000** students as one of the **top 15** candidates for distinguished **SEP.** **2020**
- Ranked **209** among **10,000**+ candidates in HPCET. **2017**

Positions of Responsibility

- Organized IIT Mandi HST 2024, hosting 100+ startups and investors. **NOV 2024**
- House Captain (2 Years), led 150-member team and executed large-scale events. **2015-2017**

Skills and Coursework

Data Science & Machine Learning: Python, SQL, , Sentiment Analysis,Time Series Forecasting,Feature Engineering
Statistical Analysis: Regression Analysis, Hypothesis Testing, Forecasting Techniques
Data Analysis & Visualization: Excel,Pivot Table, Power BI, DAX Queries.
